PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 4+ years of experience building scalable, production-grade web applications across React.js, Next.js, Node.js, and Django. Proven track record of delivering end-to-end solutions spanning responsive front-end interfaces, secure RESTful APIs, and robust database architectures using PostgreSQL, MySQL, and MongoDB. Hands-on experience integrating Web3 technologies, AI-powered features, and cloud infrastructure using AWS. Adept at collaborating with cross-functional remote teams in fast-paced environments to ship high-quality products on time.

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | **Braav** | 07/2025 – Present | USA | Remote

- Architecting and deploying full-stack Web3 and AI-integrated applications using the MERN stack and Next.js, serving thousands of active users.
- Developed AllCoin (allcoin.braav.co) — a cryptocurrency analytics platform integrating real-time blockchain data feeds and AI-powered market insights.
- Built and maintained Braav.co, a flagship product leveraging Web3 wallet authentication, smart contract interaction, and AI recommendation engines.
- Implemented secure JWT-based authentication and role-based access control (RBAC), reducing unauthorized access incidents to zero.
- Optimized React component rendering using memoization and lazy loading, achieving measurable improvements in Lighthouse performance scores.

Full-Stack Engineer | **Sharplogicians** | 09/2024 – 07/2025

- Designed and deployed 5+ full-stack MERN applications featuring responsive UIs and optimized back-end APIs, improving user engagement by 30%.
- Optimized MongoDB queries and indexing strategies, reducing average query response times by 40%.
- Implemented JWT-based authentication and RBAC, eliminating unauthorized access incidents across all applications.
- Enhanced application performance through React component optimization, code splitting, and memoization techniques.

Front-End Developer | **Precise Technology** | 06/2024 – 09/2024 | Canada | Remote

- Applied UX/UI design principles to deliver user-friendly, intuitive interfaces, increasing user retention and satisfaction metrics.
- Developed fully responsive web UIs using Tailwind CSS and React, ensuring cross-browser and cross-device compatibility.
- Integrated secure payment gateways, enabling reliable and PCI-compliant transaction flows.
- Managed complex application state with Redux, improving predictability and debuggability of client-side data flows.

Full-Stack Developer | **Orienta International** | 07/2023 – 06/2024 | Bahrain

- Developed and maintained enterprise web applications using React.js and Next.js with server-side rendering (SSR) for optimal SEO and performance.
- Built scalable RESTful APIs with Django REST Framework, integrating front-end and back-end systems across multiple products.
- Integrated third-party services and APIs (payment processors, analytics, CMS platforms) to expand application functionality.
- Collaborated in Agile sprints with design, QA, and DevOps teams to deploy features on accelerated release cycles.

Full-Stack Developer | Inara Technologies | 04/2022 – 07/2023

- Implemented and maintained multiple cross-platform applications using Flutter, Next.js, Django, and Django CMS.
- Contributed to key products: Idrisbook, Hunars, UET Hostel Management, and Glory-1 — driving feature enhancements and bug resolution.
- Designed reusable UI components in HTML, Tailwind CSS, and Flutter widgets, accelerating development velocity across projects.
- Managed relational databases (PostgreSQL, MySQL) and implemented data migration scripts for schema evolution.

TECHNICAL SKILLS

Front-End: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Redux, HTML5, CSS3

Back-End: Node.js, Django, Django REST Framework, Django CMS, RESTful API Design

Web3 & AI: Web3.js, Ethers.js, Wallet Authentication, Smart Contract Integration, AI API Integration, LLM-powered Features

Databases: MongoDB, PostgreSQL, MySQL, Query Optimization, Indexing Strategies

Mobile: Flutter, Cross-Platform Development

Cloud & DevOps: AWS, Git, GitHub, Vercel, Docker (basic), CI/CD basics

Tools & Platforms: Sanity CMS, JWT, RBAC, Agile/Scrum

NOTABLE PROJECTS

AllCoin — Web3 Cryptocurrency Analytics Platform

• <https://www.allcoin.braav.co/>

CarAdvisers — Automotive Platform

<https://caradvisers.com/>

AI Brigade — AI-Powered Platform

• <http://aibrigade.ai/>

Meerabs — E-Commerce Platform
